

Viktor Berggren

Week 2

**What do I want to learn or understand better?**

This week I would also like to learn more about React, JavaScript, Spring Boot and REST API. Furthermore I would like to know how to connect these frameworks, React, Spring Boot and Postgres together to make a website. Additionally, I would, like last week, learn more about the Scrum framework, its process and how we improve it over time.

**How can I help someone else, or the entire team, to learn something new?**

I can provide help by discussing the tutorials and project setup we will do next week. Additionally, I can help next week with setting up our project, trello and preparing to start programming during course week 3.

**What is my contribution towards the team's use of Scrum?**

I continued to help with organising our channel of communication to better prepare for the start of the Scrum process. I also attended all the meetings we had planned for the week. I will continue to contribute to the use of Scrum by following the routines and policies in the Social Contract as well as doing my part and updating the backlog and Trello we have. Furthermore, I could possibly pose as our team's Scrum Master but that is to be decided in a future meeting.

**What is my contribution towards the team's deliveries?**

This week's delivery was the Project Scope, Mockup and Business Model Canvas. I contributed with the Mockup by stating my opinion about the design, providing ideas for different designs and improvements.. Additionally, I helped by looking up what schedule we had after Easter to aid with scheduling for the weekly meetings. I also posted our project scope description on Canvas.
