

Individual Reflection - Week 9

Gustav Vadström

What do I want to learn or understand better?

This week's focus has been on learning user authentication in spring with JWT and spring security framework. It has been hard to find good documentation and tutorials on how to properly do this, but I eventually figured it out.

How can I help someone else, or the entire team, to learn something new?

I can help the team by learning, for example, about JWT authentication, and then explain to the rest of the team how it works, and how they can make use of it in the frontend application.

What is my contribution towards the team's use of Scrum?

Contributing in the meetings as well as planning the sprint and creating tasks.

What is my contribution towards the team's deliveries?

I have actively contributed in the development of the product, and in meetings so that we can finish the product in time.
