

Individual Reflection - Week 1

Gustav Vadström

What do I want to learn or understand better?

My main focus this week is to understand the working progress of an agile team. Questions like, what methods are best for communicating, how should we define a social contract, and what type of meetings are we in need of while working with Scrum. My further goal is to better understand how we can measure the amount of work done in a sprint, and how different KPI:s are used.

How can I help someone else, or the entire team, to learn something new?

By using a discord channel as the main communication link in our group, I can participate in discussions and answer questions asked in the chat. The discord voice/screen-share can also be used to cooperate while coding.

What is my contribution towards the team's use of Scrum?

We have not yet begun our work on the project, although, my future vision is to use the Scrum board and select specific tasks and accomplish them. We will also help one another with setting up new tasks and creating user-stories.

What is my contribution towards the team's deliveries?

My planned contribution is to finish my tasks during a sprint in time, and be able to help, or ask for help, in case a problem occurs. Once I'm finished with my sprint tasks, I will make sure to help anyone struggling with theirs.
