

Simon Andersson

What do I want to learn or understand better?

I have learned React and Spring better but I still need to understand javascript and the component library we are using, which is PrimeReact. I also want to adapt the web app for mobiles.

How can I help someone else, or the entire team, to learn something new?

When someone has a problem with the project they ask questions in our communication channel Discord. If I get time I can help them with the specific problem. I should also comment on my code more so others can understand it better.

What is my contribution towards the team's use of Scrum?

I have used our Scrum Board, Trello to estimate user stories and separate them into tasks. I have also answered our KPIs to help our team get an understanding on how well we use scrum and how well we are working.

What is my contribution towards the team's deliveries?

I have made several contributions to our project by completing tasks involving our Calendar View.
