

**What do I want to learn and understand better?**

I want to get a better idea of how to make user stories vertical, I find it hard in some cases to create user stories that are vertical and doable in 1 week sprints. ‘

**How can I help someone else, or the entire team, learn something new?**

I can help people understand the frontend better so that they can help with that in future sprints.

**What is my contribution towards the team's use of Scrum?**

At the start of the week we have a sprint planning meeting where we set up our user stories and tasks for the week. We all collaborate to make the sprint go smoothly and at the end of the week we have a sprint review where we review the week's work. I Contribute to all these meetings.

**What is my contribution towards the team's deliveries?**

This week I created the view that handles the creation of new activities. My tasks included creating a connection between the frontend and backend so that you could send data to the back end that would then be sent to the database. Which is needed when adding new activities to the database.
