

Individual Reflection - Week 8

Gustav Vadström

What do I want to learn or understand better?

The project is coming to its end and what I would like to know now is how to properly deploy a project like this, and how to present it to the customer.

How can I help someone else, or the entire team, to learn something new?

I can help people in the team by first learning as much as I can by myself, then share the new knowledge with the entire team.

What is my contribution towards the team's use of Scrum?

Same as last week, the sprint-planning occurs every monday morning, and everyone in the group takes part to create User Stories, tasks, and play some scrum poker.

What is my contribution towards the team's deliveries?

This week, I have been working on prices, and creating the recipe in the backend before the booking is made.
