

What do I want to learn or understand better?

I want to learn how to better work in a group on projects involving Scrum. Also how to work with an external stakeholder and what challenges that will bring.

New tools I want to learn and understand better are the Spring Framework and React.

How can I help someone else, or the entire team, to learn something new?

When we are coding together I can help someone if they need help.

I can also help them find tutorials online to follow to get a better understanding.

What is my contribution towards the team's use of Scrum?

I have taken part in the meetings and helped the group discuss the use of scrum and when we should have meetings. I have also taken part in the painting workshop to learn how to use sprints in scrum.

What is my contribution towards the team's deliveries?

I have helped the group complete the Social Contract.
