

Individual Reflection - Week 1

Summary of the week

During the first week, we had a brief start-up meeting where we introduced ourselves. Additionally, we had a more extensive meeting for establishing a Social Contract and deciding on a project.

What do I want to learn or understand better?

The learning objective for Week 1 is to develop further knowledge within the Scrum framework, primarily to establish adequate guidelines in the Social Contract for the agile way of working. I believe this is fundamental to implement the Scrum framework successfully. Furthermore, I want to understand the process of working with Scrum on a deeper level, as I believe this theoretical knowledge will provide a considerable baseline for more practical implementation. Additionally, I want to learn more about React, since the project's front-end will depend on the language. Lastly, I wish to understand my team members' preferred way of working to create the best possible working environment for this project.

How can I help someone else, or the entire team, to learn something new?

I believe I can help the team to learn something new by encouraging and facilitating the learning process. I believe I will be able to facilitate the learning process by providing the team with reading materials on relevant topics, and contribute to discussions.

What is my contribution to the team's use of Scrum?

I believe I can contribute to the team's use of scrum by learning more about the framework and propose the implementation of various Scrum methods that might be relevant for our project. Additionally, I believe the attitude towards Scrum is essential to implement a working process based on the framework. Thus, I will encourage my team to have a positive attitude, even though we might encounter challenges in our implementation.

What is my contribution to the team's deliveries?

The only delivery this week was the Social Contract. My contribution to the Social Contract was a summary of the most important topics to regard when developing the contract. This preparation facilitated the actual meeting. I also tried to encourage everyone to join the discussion during the workshop, to ensure that no opinions or thoughts were left unheard.
