Rasmus Otterlind individual reflection week 2

What do I want to learn or understand better?

I want to check out some tutorials for Spring boot and react to understand the tools we're going to be working with.

How can I help someone else, or the entire team, to learn something new?

I want to discuss the tutorials we have chosen as a team to help myself and others understand the tools better.

What is my contribution towards the team's use of scrum?

We have not started the sprints yet but as a team we picked a few days in the next week to start writing user stories and so on so that we get a less shaky start.

What is my contribution towards the team's deliveries?

This week I helped a bit in making the mockup for the final product and a tinsy tiny bit on the other parts of the project scope.
