Individual Reflection - Week 6

Gustav Vadström

What do I want to learn or understand better?

The past week I have been focusing part time on the layout of the Individual bookings page. I have wanted to learn better how to align elements and the use of Primeflex.

How can I help someone else, or the entire team, to learn something new?

By taking part in discussions and helping whenever someone needs help. Also help by teaching what I already know.

What is my contribution towards the team's use of Scrum?

The sprint-planning occurs every monday morning, and everyone in the group takes part to create User Stories, tasks, and play some scrum poker.

What is my contribution towards the team's deliveries?

I have made the individual bookings view, and added features to the backend part of the application, such as checking if a booking is paid, updating the price of a booking.
