Filip Nordqvist

<u>What do I want to learn or understand better?</u>

I would like to learn how to efficiently wrap up the application into a minimum variable product. More specifically I would like to learn how to properly build a production build of the application.

I also want to learn how to present the application in a way that is suitable for the audience.

<u>How can I help someone else, or the entire team, to learn something new?</u>

By trying to learn as much as possible about the frameworks and scrum I can be active in the discussions and I can better help if someone needs help.

<u>What is my contribution towards the team's use of Scrum?</u>

I attended all the meetings, created tasks and helped with the weekly reflection.

<u>What is my contribution towards the team's deliveries?</u>

I completed all of my tasks. I also fixed several issues and bugs with the code.
